AI Initiative

Building Operational AI Capability

PRESENTED BY

Filip Szalewicz

Why This Matters Now

The transition of AI from tools to operational employees is crucial.

Companies must adapt quickly to reduce costs, increase output, and stay competitive in the evolving market.

Macomb must move from AI curiosity to AI execution.

Adopting AI in Business
resurrection operation:.

The Problem

Current AI initiatives often result in **workshops and training** that fail to create operational change, leading to a lack of return on investment for businesses seeking effective AI deployment.

Education without deployment creates no ROI.

The Gap

Local businesses in Macomb face significant **capability gaps** in AI implementation, including a lack of technical expertise, operational architecture, and frameworks to measure ROI effectively.

This initiative closes that gap.

The Model

This initiative features a **small, elite group** focused on measurable outcomes, enabling rapid implementation of AI capabilities that directly benefit participating businesses in Macomb.

- 2 AI Implementation Fellows
- 4 Paid Pilot Businesses
- 12-Week Deployment Cycle
- Real Workflows Embedded
- ROI Tracked

What Businesses Receive

Participating businesses will gain **tangible benefits** through our initiative, including comprehensive audits, deployment of AI workflows, and detailed impact reports, ensuring real-world improvements.

No theory. Real systems.

Fellow Development

This initiative provides **intensive training** for Fellows, equipping them with essential skills for effective AI implementation and real-world deployment in local businesses.

Capability building for the region.

Financial Structure

Pilot Fee: \$10,000 per business.

Revenue allocated to:

- Fellow execution
- Oversight and methodology
- Velocity partnership
- Program infrastructure

Payment ensures commitment.

Timeline

The **12-week rollout** outlines a structured approach, ensuring each phase is carefully executed to maximize impact and efficiency in AI implementation for participating businesses.

- Weeks 1–2: Diagnostics
- Weeks 3–4: Opportunity modeling
- Weeks 5–10: Workflow deployment
- Weeks 11–12: ROI reporting & case documentation

TIMENRWS 12 Minine Rollout Plan

Expected Outcomes

The implementation of AI will yield **measurable reductions** in operational time, enhancing efficiency and promoting documented cost savings within the participating companies over the next six months.

Within 6 months:

- 4 companies with operational AI embedded
- Measurable time reduction
- Documented cost savings
- Public case showcase event

Mailization

Highlights efficiency and gains you resulting from AI can celebration

Why Start Small

AI is evolving rapidly.

Starting small allows us to **optimize for speed, iteration, and quality.**

This focused approach ensures measurable impact.

Scale comes after refinement.

Long-Term Vision

The goal is to create a repeatable implementation model that strengthens the operational competitiveness of Macomb businesses.

When successful, this becomes a practical economic development lever increasing productivity, resilience, and long term regional competitiveness.
